

# Claims

- [c1] 1.A veterinary dressing comprising a bandage and animal repellant substance wherein said animal repellant substance is at least partially incorporated into said bandage at the time of manufacture.
- 2.A veterinary dressing as in claim 1 wherein said bandage has a body facing surface and an outer surface, said outer surface being covered with said animal repellant at the time of manufacture.
- 3.A veterinary dressing as in claim 2 wherein said body facing surface and said outer surface are separated by an intermediate layer that is impermeable to the animal repellant substance.
- 4.A veterinary dressing in accordance with claim 2 wherein said body facing surface is covered with a carrier/release layer.
- 5.A veterinary dressing in accordance with claim 3 wherein said body facing surface is covered with a carrier/release layer.
- 6.A covering for a veterinary bandage comprising an elongate sheet having an animal repellant substance coated thereon.
